

Chemours Mining Solutions

Innovation and reliability for
today's mining industry

Seamless supply

As the world's largest producer of solid sodium cyanide, we're ready to fill orders and transport any quantity of product to where you need it, when you need it.

We have distribution facilities conveniently located throughout North America, along with global transportation capabilities—including delivery by certified drivers on pre-assessed and hazard-mitigated routes—that can help you overcome your biggest supply chain challenges.

Our bulk delivery options include Excel II trailers (solid-to-solution), ISOs and FLO-BIN® containers, as well as hopper cars/boxcars for secure, long-range rail transport. Plus, we'll scale up with you as your operations grow.

Eco-Pak

1,000 kg capacity

**Collapsible for
reduced footprint**

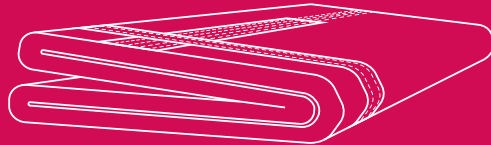

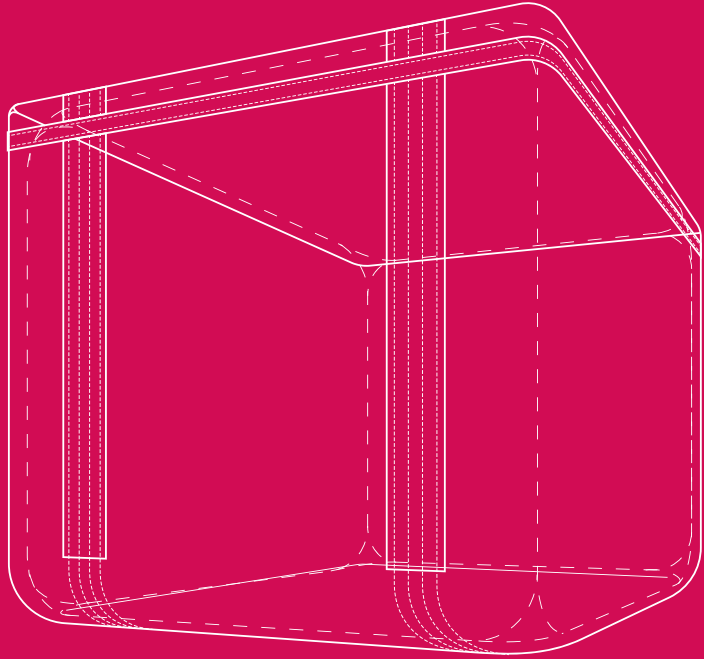

80% weight reduction

50% faster unloading

Reduced handling

No wood or nails

Superior durability

Constant innovation

Our production facility deploys next-generation technologies to manufacture a sizeable percentage of the world's supply of solid sodium cyanide, and we continue to expand our capacity.

We've engineered our entire product line for maximum safety and minimum waste. Our NaCN briquettes can be packed and shipped in a range of disposable and returnable containers, including Eco-Paks—a Chemours exclusive—which are collapsible and free of nails, enabling safer handling and disposal.

We continue to develop safer products and procedures that reduce the need for physical handling and associated labor costs.

Commitment to safety

We're dedicated to safe and responsible sodium cyanide distribution and handling and have been for more than 60 years. In fact, our own safety practices exceed ICM best practices.

Today, we're extending that commitment by supporting safer ways to package and transport our product, including on-site unloading services that allow your employees to spend less time handling materials.

We also work hand in hand with customers, providing comprehensive training and safety-focused jobsite events.

Distribution Facility: Anchorage

Distribution Facility: Carlin

Distribution Facility: Hermosillo

Distribution Facility: San Luís Potosí

Latin America HQ: Mexico City

Sales Office: Santiago

Dedicated support

Our training, advisory and quality-assurance services are simply unrivaled in the industry today. The Chemours team of full-time experts is ready to help your operations excel.

Whether it's assisting with materials handling and storage practices or regulatory needs like licensing, permitting and compliance monitoring, we're here to support you.

Your employees will benefit from a variety of in-person, in-class and online education opportunities offered by our seasoned staff, including emergency response training.

We also have a firm and enduring commitment to the communities we serve. Our 60-year heritage and reputation for safety and innovation can be a valuable tool, helping you engage with and build relationships in the regions where you operate.
