**Re: Submission of PFAS Non-Targeted Analysis and Methods Interim Report  
Chemours Fayetteville Works, Fayetteville, NC**

Dear Ms. Holman,

Chemours is submitting the enclosed PFAS Non-Targeted Analysis and Methods Interim Report. This report is prepared pursuant to Paragraph 11(a) in the executed Consent Order entered February 25, 2019 between Chemours and the North Carolina Department of Environmental Quality (DEQ) with the Cape Fear River Watch (CFRW), and the PFAS Non-Targeted Analysis and Methods Development Plan, Version 2 (the Development Plan, Chemours and Geosyntec, 2019).

The next step in the non-target analysis is to conduct enhanced assessment to develop tentative molecular structures and then develop authentic standards. Based on the sampling results, Chemours proposes to advance to this next step the 5 most abundant unknown PFAS from each sample set, as identified in the report. This adjustment to the Development Plan will retain focus on unknown PFAS which were most abundant overall, whereas the 5 most abundant unknown PFAS in any given sample do not necessarily represent the most abundant unknown PFAS overall.

If you have any questions or need any additional information concerning this report or the proposed next steps, please contact me at [Brian.D.Long@chemours.com](mailto:Brian.D.Long@chemours.com).

Sincerely,

A handwritten signature in blue ink that reads 'Brian D. Long'.

Brian D. Long
